

Trade Finance & Lease

- compensation trade-counter trade
- lease contracts with technical back-up

Through the accumulated experience of dph with over more then ten years offering also second hand machines to the world market, we are able to counter trade your purchase of a new machine with our purchase of your machine(s). Counter Trades are ment to compensate the new purchase financialy and make the deal viable. We are also able to counter trade other products available to you against a purchase of machines in our portfolio. dph is committed to your success and chooses creativity and effectivness under economical aspects to make this committment true.

dph is under consideration to provide the market a fleet of quality machinery on a lease basis with a technical back-up through a dph engineer. This will help companies to initially beginn their packing of tea and gain experience until they feel sure to be able to be active in this industry.

It will also provide companies already established in the market to compensate additional peak orders with our machines not needing to invest directly in a purchase of additional machines immediatly.
